- https://youtu.be/il0ww3Jl6FI

Are air fryer recipes simpler?

We spend less time in the kitchen nowadays (Scanlon, 2004; Wolfson et al., 2016)

This affect is amplified by new kitchen technology (Palmer, 2018)

We use more cocise language nowadays (Joshi, 2014)

My models

Model 1: $\qquad N(LogWords) \sim RecipeType + N(Ingredients)$

Model 2: $\qquad N(LogWords) \sim RecipeType * N(Ingredients)$

Model 3: $\qquad M(WordLength) \sim RecipeType + N(Ingredients)$

Model 4: $\qquad M(WordLength) \sim RecipeType * N(Ingredients)$

My plots

Descriptive Density: Oven vs. Airfryer

Interaction between Recipe Type and Ingredient Count

My plots

Lexical Complexity

Average Word Length as a function of Recipe Type
